AQUAESTIL

O NAS

ABOUT US

Aquaestil plus smo zasnovali zdaj že davnega leta 1998 z jasno vizijo, da ustvarimo stabilnega in inovativnega proizvajalska kopalniške opreme, ki bo prepoznaven po kakovostnih proizvodih in tržnem pristopu, ki vključuje posluh za želje in potrebe vsakega kupca.

Zahvaljujoč energičnemu tržnemu pristopu, nenehnemu vlaganju v vse naprednejše tehnološke rešitve v proizvodnji ter ob sodelovanju s prepoznavnimi evropskimi imeni s področja proizvodnje in prodaje kopalniške opreme, smo uspeli le v nekaj letih ustvariti ime Aquaestil kot sinonim za kakovostne in sodobne kopalniške rešitve. V naslednjih letih se je podjetje sistemsko širilo, implementiralo inovativne rešitve v vsak segment poslovanja, vse s ciljem dviga kakovosti končnih proizvodov in storitev.

Naš proizvodni program sestavlja širok assortiman akrilnih kopalniških kadi, hidromasažnih kadi, tuš kadi, steklenih tuš paravanov, masažnih in parnih kabin, masažnih stebrov, kopalniškega pohištva in proizvodov iz kompozitnih materialov, kot so umivalniki, proizvedeni s tehnologijo sintetičnega marmorja SYMAN in modernega solid surface materiala ASTONE.

Aquaestil ima danes okoli 500 zaposlenih, ki so razporejeni v štiri proizvodne enote v Dugi Resi, Ozlju, Generalskem Stolu in Našicah. Posebej ponosni smo na lasten oddelek za raziskovanje in razvoj, ki je zadolžen za dizajn in testiranje proizvodov pred njihovo postavitvijo na trg. Zahvaljujoč temu nam uspeva najti idealno rešitev tudi za najkompleksnejše kopalniške postavitev in opravljati natančen nadzor vseh proizvodov, zaradi česar so kupca zadovoljni, saj lahko v njih uživajo vrsto let.

Poleg izredno dobrih rezultatov na hrvaškem trgu kot dokaz kakovosti in nenehnega dela ter truda priča tudi dejstvo, da so proizvodi Aquaestil prepoznavni tudi na zahtevnem trgu EU, kjer nastane večina skupnih prihodkov podjetja.

Organizacija podjetja poteka skladno s certificiranim sistemom kakovosti, ki ga ima podjetje skladno z normo ISO 9001:2000, nanaša pa se na področji proizvodnje in prodaje ter vzdrževanje celotnega poslovnega in tehnološkega sistema. Vsi Aquaestil proizvodi so narejeni po najvišjih evropskih standardih, njihove skupne lastnosti pa so: funkcionalnost, privlačen dizajn in vrhunska kakovost.

Upamo, da boste med gledanjem pričujočega kataloga našli idealno rešitev za Vaš najljubši prostor – kopalnico.

We have founded Aquaestil plus company in 1998. with a clear vision to create a stable and innovative bathroom equipment manufacturer recognizable by quality products and market approach which implies listening to the wishes and needs of each customer.

Thanks to the energetic market approach, constant investments in more advanced technological solutions in production and cooperation with renowned European names from the domain of production and sales of bathroom equipment, we have succeeded in positioning the name Aquaestil as a synonym for quality and modern bathroom solutions. In the coming years, the company is systematically expanding, implementing innovative solutions in every business segment, all with the aim of raising the quality of end products and services.

Our production program consists of a wide range of acrylic bathtubs, whirlpool bathtubs, shower trays, glass shower screens, massage and steam cabins, massage columns, bathroom furniture and composite material products such as sinks made from synthetic marble SYMAN and modern solid surface material ASTONE.

Aquaestil today has about 500 employees deployed in four production units located in Croatia. We are particularly proud of our own R&D department that is in charge of designing and testing products before placing them on the market. Thanks to this, we are able to find the ideal solution for the most complex bathroom configurations and to carefully control all our products to the satisfaction of the customers who can enjoy them for many years.

In addition to the outstanding results on the Croatian market, as a proof of quality and continuous development we are proud that Aquaestil products are recognized in a demanding EU market where most of the company's total revenues are realized.

The organization of the company is led by the quality system certified in accordance with the ISO 9001:2000 standard, which refers to the area of production and the maintenance of a whole management and technology systems. All Aquaestil products are made in accordance with the highest European standards and functionality while neat design and top quality are their common characteristics.

We hope that you will find the ideal solution for your favorite room while going through this catalogue - the bathroom!

KOPALNE KADI BATHTUBS

Aquaestil kopalne kadi so izdelane iz 100% litega sanitarnega akrila, ki se danes smatra kot najprimernejši material za tovrstne izdelke. Je izjemno prijeten na dotik, njegove glavne značilnosti pa so obstojnost barve, visoka trdota, kemična odpornost in predvsem brezhibni sijaj tudi po večletni uporabi. Zahvaljujoč molekularni strukturi so kadi Aquaestil izjemno gladke in imajo minimalno mikroskopsko poroznost, zato mikroorganizmi ne ostanejo na njihovi površini, kar zagotavlja maksimalno higieno v kopalnici. Vse naše kopalne kadi so posebej ojačane na ključnih mestih, s čimer je zagotovljena njihova vzdržljivost in dolga življenjska doba. Večina modelov je na voljo tudi v različici z oblogo in s široko paleto dodatne opreme, kot so masažni stebri in vgradne armature.

Aquaestil bathtubs are made of 100% casted sanitary acrylic, which is considered to be the most suitable material for this purpose. The casted sanitary acrylic is very pleasant to the touch and is characterized by color durability, hardness, chemical resistance and, above all, immaculate glow even after many years of use. Thanks to its molecular structure, Aquaestil bathtubs are extremely smooth and have minimal microscopic porosity, so microorganisms do not stay on their surface, which ensures the maximum level of hygiene in your bathroom. All our baths are specially strengthened in key locations to ensure their durability and longevity. Most models are also available in a variant with a panel and a wide range of accessories such as massage systems and built-in mixers.

VICTORIA

SLIM PLUG & PLAY

Slim kadi so prepoznavne po elegantni ovalni obliki in slot prelivu. Prodajajo se s tovorniško montirano in fiksirano oblogo, prelivno-otočno garnituro s klik-klak ventilom in gibljivo cevjo za priključek na odvod.

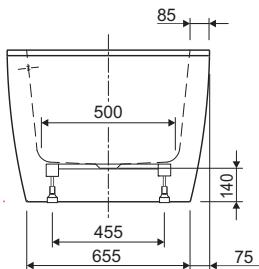

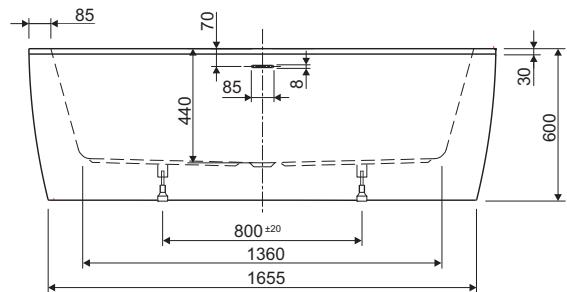

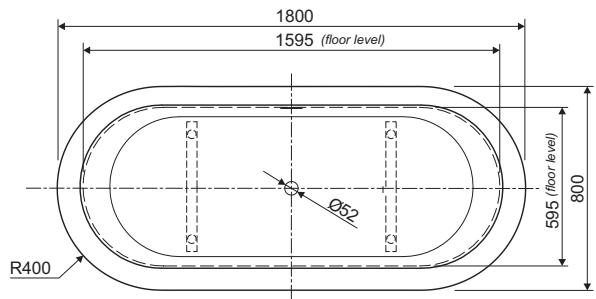

Te kadi so dostopne v treh funkcionalnih in estetskih oblikah – za centralno montažo, za montažo ob steni ali v kotu kopalnice. Standardno se prodajajo s slot prelivom, možno pa je tudi naročilo z okroglim prelivom, ko je potrebno polnjenje prek preliva.

Pri montaži zadostuje, če se spoji gibljivo cev na odvod, učvrsti kad na tla ali ob steno, natoči vodo in kad je že pripravljena na kopanje!

Slim bathtubs are characterized by their elegant oval shape and slot overflow. They are delivered with factory-fitted and fixed panel, overflow-waste system with click-clack valve and flexible hose for drain connection.

These bathtubs are available in three functional and aesthetically pleasing shapes - for central mounting, wall mounting or corner mounting. They are delivered with slot overflow but can also be ordered with round overflow when filling trough overflow is required.

Installation is very simple; it is enough to connect the hose to the drain, fix the bathtub to the floor or wall, fill the water in and you are set to go!

AKRILNE TUŠ KADI

ACRYLIC SHOWER TRAYS

Aquaestil tuš kadi so izdelane iz 100% litega sanitarnega akrila, zaradi česar so prijetne na dotik in zelo enostavne za čiščenje in vzdrževanje. Zaščitne lastnosti tega materiala kot tudi dejstvo, da se mikroorganizmi ne zadržujejo na njegovi površini, prispevajo k vašemu zdravju in varnosti. Naša široka ponudba tuš kadi obsega več modelov, od zelo plitkih, namenjenih vgradnji v nivo tal, ki v kombinaciji s steklenimi paravani višine 200 cm ustvarijo sodoben „walk-in shower“ koncept, do klasičnih modelov, namenjenih vzidavi ali z oblogo.

Aquaestil shower trays are made of 100% casted sanitary acrylic, which makes them comfortable and very easy to clean and maintain. The anti-slip properties of this material as well as the fact that pathogenic particles retain less on acrylic surface due to high level of non porosity contribute to your health and safety. Our extensive assortment consists of several models of ultra-flat shower trays designed for floor-level installation which can be combined with Aquaestil 200 cm high shower screens, featuring a modern walk-in shower concept and classic shower tray models designed for cladding or fitting with a corresponding panel.

TUŠ KADI IZ LITEGA MARMORJA

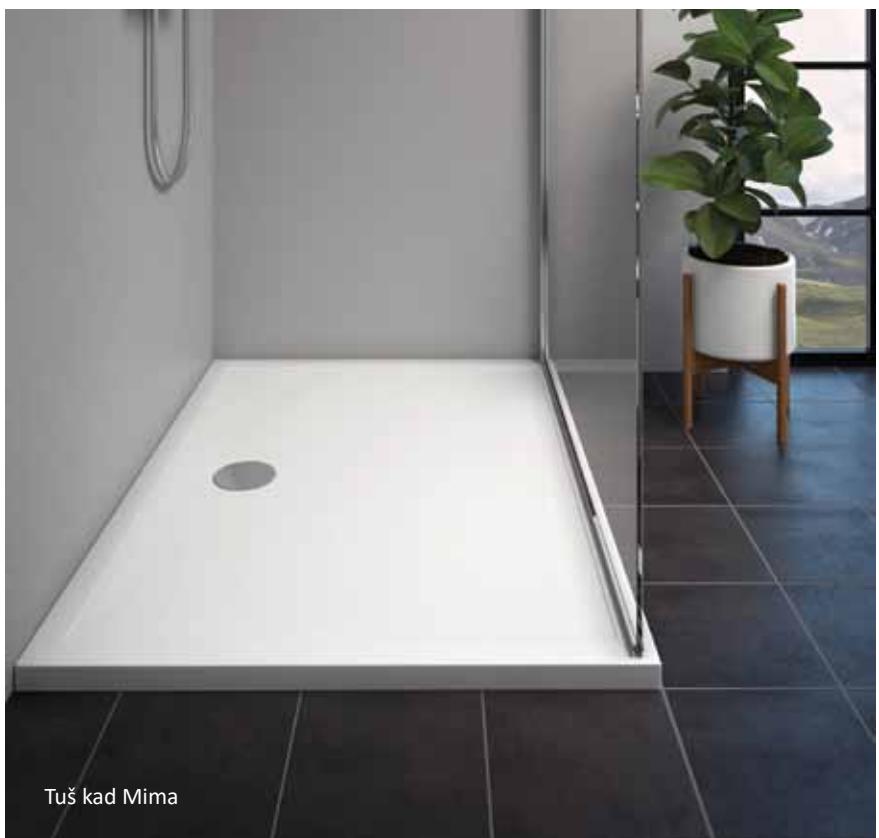

MINERAL MARBLE SHOWER TRAYS

Liti ali umetni marmor je napredni material, sestavljen iz naravnih mineralnih in kamnitih delcev, poliesterja in smole, ki služi kot sredstvo za združevanje. Ta material je narejen v posebej izdelanih kalupih, vsaka tuš kad pa je deležna natančne končne obdelave in tretmaja z izrazito vzdržljivim in odpornim Gelcoat® materialom, zaradi katerega je površina popolnoma sijajna in odporna na praske.

Tuš kadi iz litega marmorja se ponašajo z maksimalno trdnostjo in s popolnimi linijami, ki jih je možno izvesti zahvaljujoč naprednim lastnostim tega materiala. Površina teh tuš kadi je sijajna in zelo preprosta za vsakodnevno čiščenje in vzdrževanje.

Mineral or artificial marble is an advanced material that is composed of natural mineral and stone particles, polyester and resin bonding agents. This material is casted in specially made moulds and every shower tray passes detailed finishing and is treated in a tough, hardwearing scratch resistant Gelcoat® with a perfect white glossy finish.

Mineral marble shower trays are characterized by maximum strength and perfect lines that can be achieved thanks to the advanced properties of this material. The surface of these shower trays is glossy and very easy to clean and maintain.

Shiny je tuš kad, narejena iz litega marmorja, prepoznavna pa je zlasti po posebej narejenem pokrovu sifona in modernih ter ostrih linijah.

Shiny is a mineral marble shower tray distinctive by its special siphon cover and modern, sharp lines.

PARAVANI ZA KADI BATH SCREENS

Aquaestil paravani za kadi so mešanica kakovostnih materialov, vrhunske izdelave in dizajna. Zelo širok nabor modelov in možnosti, ki so na voljo, vam zagotavlja, da boste našli idealno izbiro za vašo kopalnico.

Večina Aquaestil pravanov je izdelana iz 6 mm kaljenega stekla, ki je dovolj lahko za enostavno uporabo in hkrati dovolj trdno za najvišjo stopnjo varnosti. Pri večini modelov je na voljo možnost prozornega ali reliefnega (oz. satiniranega) stekla, ki bo poleg funkcionalnih zagotovo zadovoljilo tudi najvišje estetke kriterije.

Profilni zagotavljajo trdno konstrukcijo paravanov in njihovo pritrditve, izjemna skrb pa je posvečena tudi njihovi kakovosti in dizajnu, ki sledi sodobnemu konceptu kopalniških ureditev. Profili so pri večini paravanov na voljo v srebrni ali beli barvi. Poseben nano premaz, ki preprečuje nabiranje vodnega kamna na steklu, je standardno nanešen na večino paravanov, le-te pa je mogoče narediti tudi po meri in tako prilagoditi specifičnim kopalniškim konfiguracijam.

Aquaestil screens for baths and shower trays are the perfect blend of quality materials, top workmanship and design. Our extensive range of models and options we offer are a guarantee that you will find the ideal choice for your bathroom.

Most Aquaestil screens are made of 6 mm thick glass that is easy enough for easy manipulation but also tough enough for the highest level of safety. Most models offer a choice of transparent or satin glass that, besides those functional, will surely satisfy even the highest aesthetic criteria.

The profiles provide a necessary firmness to the construction and allow safe installation, while exceptional attention is paid to their quality and design that follows the modern concept of bathroom decoration. Profiles of the most screens are available in white or silver finishing. A special nano coating that successfully blocks lime accumulation is standard for most screens which can also be custom-made to match specific bathroom configurations.

NANOS PROTI VODNEMU KAMNU

ANTI-LIMESCALE COATING

Vsi paravani, označeni s tem znakom, so tovarniško, brez doplačila obdelani z nanosom proti vodnemu kamnu, ki dodatno olajša vsakodnevno čiščenje in vzdrževanje.

Ta napreden način zaščite steklenih površin temelji na nanotehnologiji: nanosu nanodelcev s komponentami, ki se trdno vežejo na steklo površino in odbijajo druge komponente, kot so voda, razna olja, umazanija, insekti in vodni kamen. Ker se voda (in s tem tudi vodni kamen), umazanija in glivice ne morejo oprijeti površine, je čiščenje izjemno enostavno.

Nanos proti vodnemu kamnu ščiti tudi pred nepopravljivo korozijo stekla, svoje delovanje na površini pa zadrži dalj časa, brez iztrošenja.

Zaradi dolgotrajnega učinka premaza obdelane površine ni priporočljivo čistiti s čistili, temveč zadošča, da jo obrišete z vlažno krpo (najbolje iz mikrovlaken), da je površina ponovno kristalno čista.

All shower enclosures and screens marked with this symbol are pre-treated on both sides with anti-limescale coating which significantly eases daily cleaning and maintenance.

This sophisticated method of glass surfaces protection is based on the application of nanotechnology. Nanoparticles are firmly attached to the glass surface and repel other components like water, oil, dirt, insects and limescale, making regular cleaning very easy.

Anti-limescale coating also effectively protects from irreversible glass corrosion, while nanoparticles retain their properties for longer period without wearing down.

For long-lasting effect od the anti-limescale coating, it is recommended to use only microfiber cloth and avoid using any kind of common chemical cleansers.

Transparent screens are treated with anti - limescale coating on both sides, while screens with relief and satinated glass are treated only on the inner, smoother side.

reliefno steklo textured glass

prozorno steklo transparent glass

satinirano steklo satinated glass

this screen can be also ordered as a combination of Zenith Wall and +W, without addition of +L wall

Artego D+W je luksuzen paravan, sestavljen iz drsnih vrat in fiksne stene. Napreden drsn sistem je narejen brez profila, s pomočjo drsne palice in koleščka z večjim premerom, ki zagotavlja gladko in ugodno odpiranje vrat. Paravan je narejen iz 8 mm kaljenega stekla in namenjen vgradnji na plitve tuš kadi ali keramične ploščice.

Artego is a luxurious shower enclosure that consists of a sliding door and a fixed wall. The advanced sliding system is designed without profiles, with a sliding rod and castors of larger diameter, which contributes to the ease of cleaning and maintenance, but also the aesthetic impression of the entire bathroom. The enclosure is made of 8 mm thick tempered glass and is designed for installation on a very shallow shower tray or ceramic tiles.

Saturno II D+W je tuš paravan, sestavljen iz trodelnih drsnih vrat in ene fiksne stene.

Saturno II D+W is a shower screen that consists of a three-part sliding door and a fixed glass wall. Due to its wide profiles and ability to be adjusted, this shower screen is particularly effective when used with shower trays that do not match standard dimensions. Saturno II D+W offers the possibility to be combined with two fixed glass walls and a door, if the shower tray is adjacent to only one wall. The handles are integrated in the outer profile which also have a magnetic seal. This shower screen is specially suitable for small shower trays thanks to the wider space it can provide in the entrance.

Dodatki za paravane

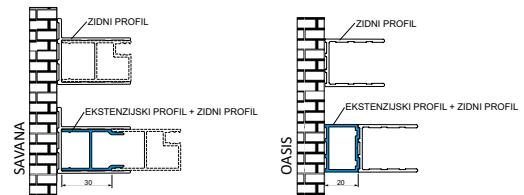

Shower screen options

EKSTENZIJSKI PROFIL

Ekstenzijski profil je dodatek za stenski profil paravana, uporablja pa se, ko je širina prostora za tuširanje za do 2 cm (Oasis, Mars) oziroma 3 cm (Savana, Sogno) večja od vgradbenih mer, označenih za posamezno standardno dimenzijo paravana. Na ta način se izognemo naročilu paravana po meri.

EXTENSION PROFILE

Extension profile is an addition to the wall profile of the screen and is used when the width of the shower area is up to 2 cm (Oasis, Mars) or 3 cm (Savana, Sogno) greater than the installation dimensions indicated for a particular standard screen size. This eliminates the need of making shower screen by measure.

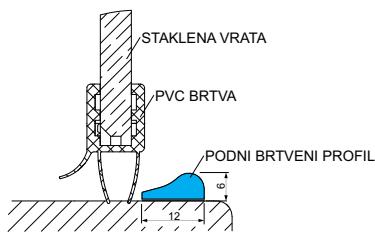

TALNI TESNILNI ALUMINIJSKI PROFIL

Ta dodatek se prilepi na rob tuš kadi ali tal iz keramičnih ploščic, predvidenih kot prostor za tuširanje, in zagotavlja boljše tesnjenje tuš kabini s pomičnimi in preklopni vrti. Postavlja se tako, da se talno tesnilo na vratih v zapret položaju postavi na talni aluminijiški tesnilni profil. Prodaja se v dolžini 100 cm in po potrebi se skrajša na dolžino vrat.

SEALING ALUMINIUM FLOOR ELEMENT

This accessory is applied to the edge of a shower tray or a ceramic tile floor used as a shower area and provides a better sealing for enclosures with swing or foldable doors. It is positioned in such a way that the door seals in the closed position aligns with the aluminum sealing profile. It is delivered in length of 100 cm and is shortened if necessary to the width of the door/particular standard screen size. This eliminates the need of making shower screen by measure.

NANOS PROTI VODNEMU KAMNU

Vsi paravani, označeni s tem znakom, so tovarniško, brez doplačila obdelani z nanosom proti vodnemu kamnu, ki dodatno olajša vsakodnevno čiščenje in vzdrževanje.

Ta napreden način zaščite steklenih površin temelji na nanotehnologiji: nanos na nanodelcev s komponentami, ki se trdno vežejo na steklene površine in odbijajo druge komponente, kot so voda, razna olja, umazanija, insekti in vodni kamen. Ker se voda (in s tem tudi vodni kamen), umazanija in glivice ne morejo oprijeti površine, je čiščenje izjemno enostavno.

Nanos proti vodnemu kamnu ščiti tudi pred nepopravljivo korozijo stekla, svoje delovanje na površini pa zadrži dalj časa, brez iztrošenja.

Zaradi dolgotrajnega učinka premaza obdelane površine ni priporočljivo čistiti s čistili, temveč zadošča, da jo obrišete z vlažno krpo (najbolje iz mikrovlnken), da je površina ponovno kristalno čista.

ANTI-LIMESCALE COATING

All shower enclosures and screens marked with this symbol are pre-treated on both sides with anti-limescale coating which significantly eases daily cleaning and maintenance.

This sophisticated method of glass surfaces protection is based on the application of nanotechnology. Nanoparticles are firmly attached to the glass surface and repel other components like water, oil, dirt, insects and limescale, making regular cleaning very easy.

Anti-limescale coating also effectively protects from irreversible glass corrosion, while nanoparticles retain their properties for longer period without wearing down.

For long-lasting effect of the anti-limescale coating, it is recommended to use only microfiber cloth and avoid using any kind of common chemical cleansers.

Transparent screens are treated with anti-limescale coating on both sides, while screens with relief and satinated glass are treated only on the inner, smoother side.

DODATNA OPREMA
ACCESSORIES

Vgrajene armature Built-in mixers

Na večino kadi je možno po želji vgraditi tudi armaturo. V ponudbo smo uvrstili nekaj modelov armatur ter tudi možnost polnjenja kadi prek prelivno-odtočne garniture. Če namesto standardnega izliva za kad vgrajujete prelivno-odtočno garnituro, jo lahko kombinirate z armaturama Cristina in GO.

Most bathtubs can be equipped with a built-in mixer. We offer several models of mixers and an alternative fill-in option through overflow-outflow set that can be combined with Cristina and GO mixers.

Masažni stolpi Massage columns

Masažni stolpi so zelo priročna dopolnitvena oprema kadi ali tušu, ker ne zahtevajo sprememb instalacij, so preprosti za montažo in nudijo dodatno sprostitev med kopanjem ali tuširanjem.

Massage columns are a very practical addition to an existing bathtub or shower tray as they do not require alterations to existing installations. They are easy to install and offer additional relaxation during bathing or showering.

Prelivno - odtočna garnitura s samopolnjenje Overflow - outflow set for auto-filling

Garnitura je odlična zamenjava za klasični izliv. Polnjenje se izvaja s pomočjo skrite odprtine v nivoju preliva. Regulacija toka se izvaja s pomočjo vgrajene armature.

This set is a great replacement for a standard outflow, as bathtub is filled through hidden opening in the overflow level. Water flow is regulated with a built-in mixer.

Follow Me (sifon) Follow Me (siphon)

Ko po tuširanju odložite ročko, manjša količina vode spolzi po cevki v kad. Sifon Follow Me zbere to vodo in zagotavlja, da je prostor pod tušem popolnoma suh. Sifon Follow Me se vgrajuje v masažne kadi samo na zahtevo kupcev in ob doplačilu nadomesti običajen sifon. Ta sifon je na voljo tudi kot samostojen izdelek, ki ga lahko sami vgradite po priloženih navodilih.

When disposing shower head after using it, usually a smaller amount of water sprinkles in the space beneath the bathtub following the shower tube. Siphon Follow Me collects that residual water ensuring total dryness. Siphon Follow Me is mounted on massage bathtubs only by request, thus replacing the standard one while difference in price is supplemented. This siphon is also available as a separate product which can be installed according to the appended installation manual.

OPREMA ZA KADI IN TUŠ KADI ADDITIONAL EQUIPMENT

Obloge za kadi in tuš kadi Panels for bathtubs and shower trays

Obloge so namenjene za elegantno zapiranje kopalnih in tuš kadi z ene, dveh ali treh strani. Kadi se lahko naročijo z že tovarniško montirano oblogo in nogicami ali pa posebej. Montaža obloge se posebej priporoča pri masažnih kadeh, saj je tako olajšano njihovo vzdrževanje in servis.

The panels are used to elegantly close the bathtub or shower tray from one, two or three sides. Products can be ordered with a factory-fitted panel and pedestal (legs) or as separate elements for later mounting. Panels are especially recommended for bathtubs with massage systems because due to easier access in case of maintenance.

Kotne letvice za kadi in tuš kadi Corner profiles for bathtubs and shower trays

Kotne letvice so zaključni elementi, ki se namestijo na spoj kadi s steno po montaži kadi ali tuš kadi. Z uporabo kotnih letvic se zagotovi vodotesnost ne spoju kadi s steno. Poleg tega prekrijejo morebitno neizravnost stene, do katere lahko pride pri vgradnji, s tem pa se izognete pretrianemu silikoniranju in zadrževanju umazanije. Ker so letvice prevlečene z akrilom, bodo vedno lepo izgledale (ne bodo s časom porumenele). Kotne letvice se prodajajo kot dva zasebna seta.

Za kadi:

- letvice dolžine 195 cm (x2)
- kotniki (x2)
- zaključni elementi (x2)

Za tuš kadi:

- letvice dolžine 95 cm (x2)
- kotnik (x1)
- zaključni elementi (x2)

Corner profiles are finishing elements placed in the junction between wall and bathtub. They ensure the tightness of the joint and also cover any imperfections occurred during installation. They also help to avoid using silicone in excess and the accumulation of dirtiness. Since profiles are coated in acrylic, their durability and appearance are guaranteed (they will not turn yellow over time). Corner profiles are available in two sets:

For bathtubs:

- 195 cm corner profiles (x2)
- corner elements (x2)
- endings (x2)

For shower trays:

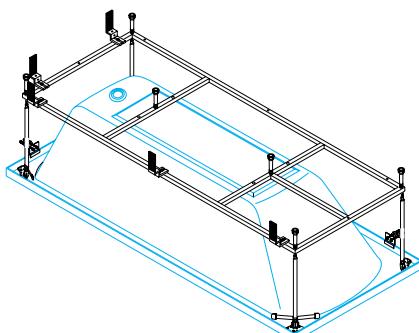

- 95 cm corner profiles (x2)
- corner element (x1)
- endings (x2)

Podstavki za kadi Bathtub pedestal

Podstavek se uporabi, ko je treba poleg nivelandje kadi namestiti tudi oblogo. Z nameščitvijo podstavka se doseže dodatna trdnost in stabilnost kadi. Tako kot pri nogicah je tudi izbira podstavka odvisna od tipa kadi. Natančna navodila za montažo so priložena vsakemu kompletu, montaža pa je enostavna tudi brez pomoči strokovnjaka.

Pedestal is used when a panel will be installed. Besides helping to level the bathtub, it also provides additional strength and stability to the whole installation. Like with bathtub legs, this pedestal is used depending on the bathtub model. Detailed installation instructions are included in every kit.

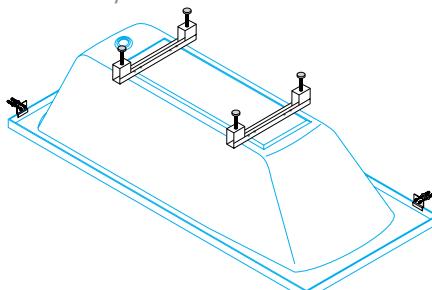

Nogice za kadi Bathtub legs

Uporabne so za nivelandijo kopalnih kadi pri obzidanju ali nameščanju obloge (v kombinaciji s setom za nameščanje obloge). V kompletu se nahajajo tudi montažni zidni profili, z uporabo katerih se doseže dodatna stabilnost in končno pozicioniranje kadi.

Odvisno od oblike in velikosti kadi obstaja več vrst nogic, zato je ob naročilu treba izbrati model, ki ustreza tipu kadi. Natančna navodila za montažo so priložena vsakemu kompletu.

Bathtub legs are used to level and support the bathtub when it is being built-in or when a panel is being installed (in combination with the panel installation kit). Prefabricated wall fittings are also included to ensure the stability of the bathtub and its accurate installation.

Bathtub legs vary depending on the shape and size of the bathtub, therefore it is important to choose the right legs for the bathtub of your choice. Detailed installation instructions are included in every kit.

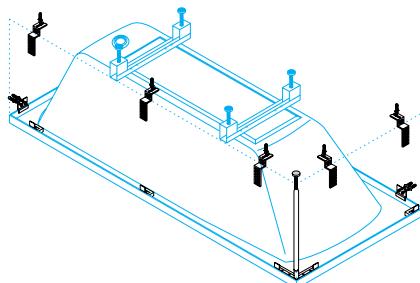

Set za nameščanje obloge

Panel installation kit

Uporabi se pri nameščanju obloge v kombinaciji z nogicami. Natančna navodila za montažo so priložena vsakemu kompletu.

This kit is used when installing a panel. It is used in combination with the bathtub legs. Detailed installation instructions are included.

Prelivno - odtočna garnitura

Overflow - outflow system

Prelivno-otočna garnitura se ne dobavlja skupaj s kadjo, ampak jo je potrebno naročiti posebej. Služi za pravilno in popolno odtekanje vode iz kadi. Za vsaki model kopalne kadi je potrebno preveriti dolžino prelivno-otočne garniture, ki je lahko 50, 70 ali 100 cm.

Outflow - overflow system is not supplied standardly with Aquaestil baths. It has to be ordered as a separate item. Please check necessary length of the system for each bathtub model. Available lengths of overflow - overflow system: 50, 70, 100 cm.

Rešetka za vzdano masažno kad

Metal grid for built-in whirlpool bathtubs

Da se zagotovi kroženje zraka, je treba pri masažnih kadeh, ki se vzdajo brez obloge, vgraditi rešetko. Priporočena minimalna dimenzija je 45x35 cm.

To ensure proper air circulation on massage bathtubs that are built-in without a panel, it is necessary to install this grid. Minimal recommended dimension is 45x35 cm.

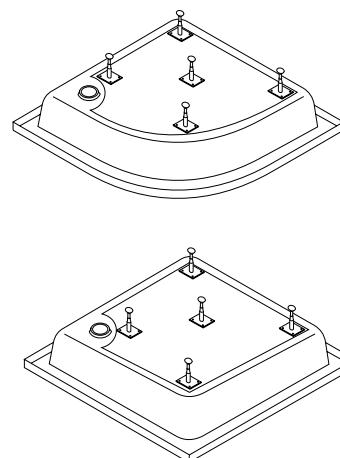

Nogice za tuš kad

Shower tray frames - 5 parts

Uporabijo se za nивелациjo tuš kadi ob obzidanju ali nameščanju obloge. Če naročite tuš kad z oblogo, bo dobavljena z že nameščenimi nogicami in oblogo.

Shower tray frames are used to level and support shower trays when built-in or installed with a panel. When ordering a shower tray with panel, it will be delivered with its pre-assembled frame and panel.

VZDRŽEVANJE IN SERVIS MAINTENANCE & SERVICE

Kopalne kadi in tuš kadi Bathtubs and shower trays

Aquaestil kopalne kadi so narejene iz 100% litega sanitarnega akrila se odlikujejo po optimalni topotni in zvočni izolaciji, površinsko gladkost in sjaj pa mu je mogoče povrniti tudi po manjših mehanskih poškodbah.

Za razliko od kopalnih kadi in kadi za tuširanje narejenih iz materiala ABS ali poliestra, pri sanitarnem akrilu ni omejitev pri sanaciji površinskega sloja, saj vse značilnosti strukture materiala ostanejo nespremenjene.

Za čiščenje uporabite mehko krpo ali gladko gobico in tekoči detergent. Izogibati pa se je potrebno abrazivnim čistilnim sredstvom, saj bi lahko njihova zrna poškodovala površino kadi.

Za odstranjevanje vodnega kamna se priporoča uporaba gobice, namočene v alkoholni kis. Po čiščenju je potrebno kad obrisati še s suho krpo.

Če kad izgubi svoj sjaj, jo lahko spolirate s polirno pasto, ki jo nanesete na krpico ali kos vate.

Aquaestil bathtubs and shower trays are made of 100% sanitary cast acrylic which has numerous advantages over other sanitary materials such as ABS and polyester. Its homogenous structure allows surface smoothness and shine to be restored to its original condition even after minor mechanical damages.

Unlike bathtubs made from ABS or polyester, with sanitary cast acrylic there are no restrictions regarding refurbishment of the surface layer because all properties of the material within its structure remain unaltered. Bathtubs made of sanitary cast acrylic are characterized by optimum thermal and acoustic insulation and smooth shiny surfaces which are very easy to maintain.

For daily cleaning, use a fabric or sponge and smooth liquid detergent. Avoid using abrasive mediums that contain particles in order to prevent the surface from damaging and losing its shine.

To remove lime scale without damaging the bathtub, use a sponge soaked in vinegar or vinegar based products. After cleaning, wipe with a dry fabric.

If original shine is lost, use a polishing paste and polish it until the initial look is restored. Regular cleaning is recommended to maintain the product in optimum conditions. AQUA CLEAN acrylic + glass guarantees you maximum glossiness and cleanliness.

If the bathtub has suffered minor damage such as scratches, they can be repaired with sandpaper of granulation 240-800 and a polishing paste. If damage cannot be repaired, contact our customer service department that will suggest you alternative methods for solving the problem.

Paravani za kadi in tuš kadi Shower screens

Večina paravanov s prozornim steklom je tovarniško obdelanih z nanosom proti nabiranju vodnega kamna, kar močno olajša njihovo vsakodnevno čiščenje in vzdrževanje. Ta tehnologija je sestavljena iz nanašanja nanodelcev s komponentami, ki so trdno pritrjene na stekleno površino in odporno proti drugim sestavinam, kot so voda, razna olja, umazanja, žuželke in ostanki iz kamna. Prav tako ščitijo pred nepopravljivo korozijo stekla.

Po obdelavi je steklo odporno na trenje, njegovo delovanje delcev na površini pa se vzdržuje dlje časa brez potrebe po ponovni obdelavi.

Profili paravana so izdelani iz aluminija, eloksirani v srebru ali prevlečeni z zapečeno belo barvo v prahu. Eloksiranje ali anodna oksidacija je proces obdelave površin, specifičen za aluminij. S tem procesom aluminij dobi značilno metalizirano barvo in trajno zaščito pred korozijo, kar je izjemno pomembno v vlažnih pogojih, kot je kopalnica. Zaradi visoke kakovosti samega materiala se zmanjša potreba po vzdrževanju in se zmanjša redna uporaba klasičnih kemično neabrazivnih čistilnih sredstev za kovinske in steklene dele v kopalnici. Priporočamo uporabo Aquaclean akril + čistilo za steklo.

Most shower screens are pre-treated with a special anti-scale layer. This technology consists of the application of nano particles onto the glass surface in order to repel other particles that tend to stick; such as oil, dirt, insects and lime scale. It also protects against irreparable glass corrosion.

After treatment, glass is much more resistant to friction and it is preserved for a longer period of time.

Profiles of the shower screens are made of aluminum, anodized in silver color or coated in white color. Anodizing is a specific process to protect aluminum. It ensures its shiny silver color and protects it against corrosion, which is extremely important in moisturous spaces such as bathrooms. Due to the quality materials and processes implemented in the shower screen production, maintenance is reduced to use of a regular conventional nonabrasive chemical for cleaning the metal parts.

Masažni sistemi Massage systems

Poleg rednega vzdrževanja akrilnih površin je potrebno redno vzdrževati masažne sisteme. Glede na dejstvo, da gre za celo vrsto različnih vrst šob in cevi, ki se uporabljajo za vodo, neustreznو in nepravilno vzdrževanje sistema z nabiranjem in kopičenjem umazanije ustvari idealno okolje za razvoj bakterij in mikroorganizmov. Priporočamo, da po kopanju redno uporabite razkužilo.

Za sisteme, ki nimajo posebnega programa za samodejno dezinfekcijo, izdelek postavite v vodo in pustite, da kroži s sistemom. Za masažne sisteme z vgrajenimi rezervoarji, ki imajo možnost samodejne dezinfekcije, izdelek postavite v predvideno posodo in vklopite sistem za dezinfekcijo. V ta namen priporočamo izvirno dezinfekcijsko zdravilo Aquaestil.

Regular maintenance of massage systems is very important. Since they are complex by nature; with many pipes and nozzles to carry the water, inadequate and irregular maintenance can cause accumulation of dirt and create fertile ground for bacteria and microorganisms. We advise you to regularly use some disinfection detergent.

For systems that do not have an automatic disinfection programme, simply pour the cleaning detergent in the water and let it circulate few times. With built-in massage systems in which automatic disinfection can be implemented, just pour in the detergent into the containers and turn on disinfection. For this purpose, we recommend original Aquaestil disinfection detergent.

AQUACLEAN SREDSTVO ZA ČIŠČENJE AQUACLEAN CLEANSER

AQUACLEAN Quando akril + steklo je namenjen čiščenju in vzdrževanju akrilnih kopalnih kadi, tuš kadi, masažnih in parnih tuš kabin, steklenih paravanov ter druge akrilne in steklene opreme.

AQUACLEAN Quando sredstvo za aktivno zaščito in vzdrževanje kopalniškega pohištva je zelo učinkovito tudi na drugih lesenih površinah, ki jih želite zaščititi ali jim povrniti prvotni slikaj.

AQUACLEAN Quando acrylic + glass is intended for cleaning and maintaining acrylic bathtubs, shower trays, massage and steam shower systems, glass shower screens and other acrylic and glass equipment.

AQUACLEAN Quando. Agent for active protection and maintenance of bathroom furniture. It is also very effective on any other wooden surfaces as it protects and restores the original look.

NANOS PROTI VODNEMU KAMNU - SET ANTI-LIMESCALE SET

Večina Aquaestil paravanov je tovarniško obdelana z nanosom proti vodnemu kamnu. Kot dodatno možnost pa vam ponujamo poseben set AQUACLEAN - zaščitni nano premaz za steklo in keramiko. S pomočjo tega seta lahko obnovite nanos na steklenih paravanih ali pred umazanjem in vodnim kamnom zaščitite druge steklene in keramične površine v vašem domu.

Set je sestavljen iz:

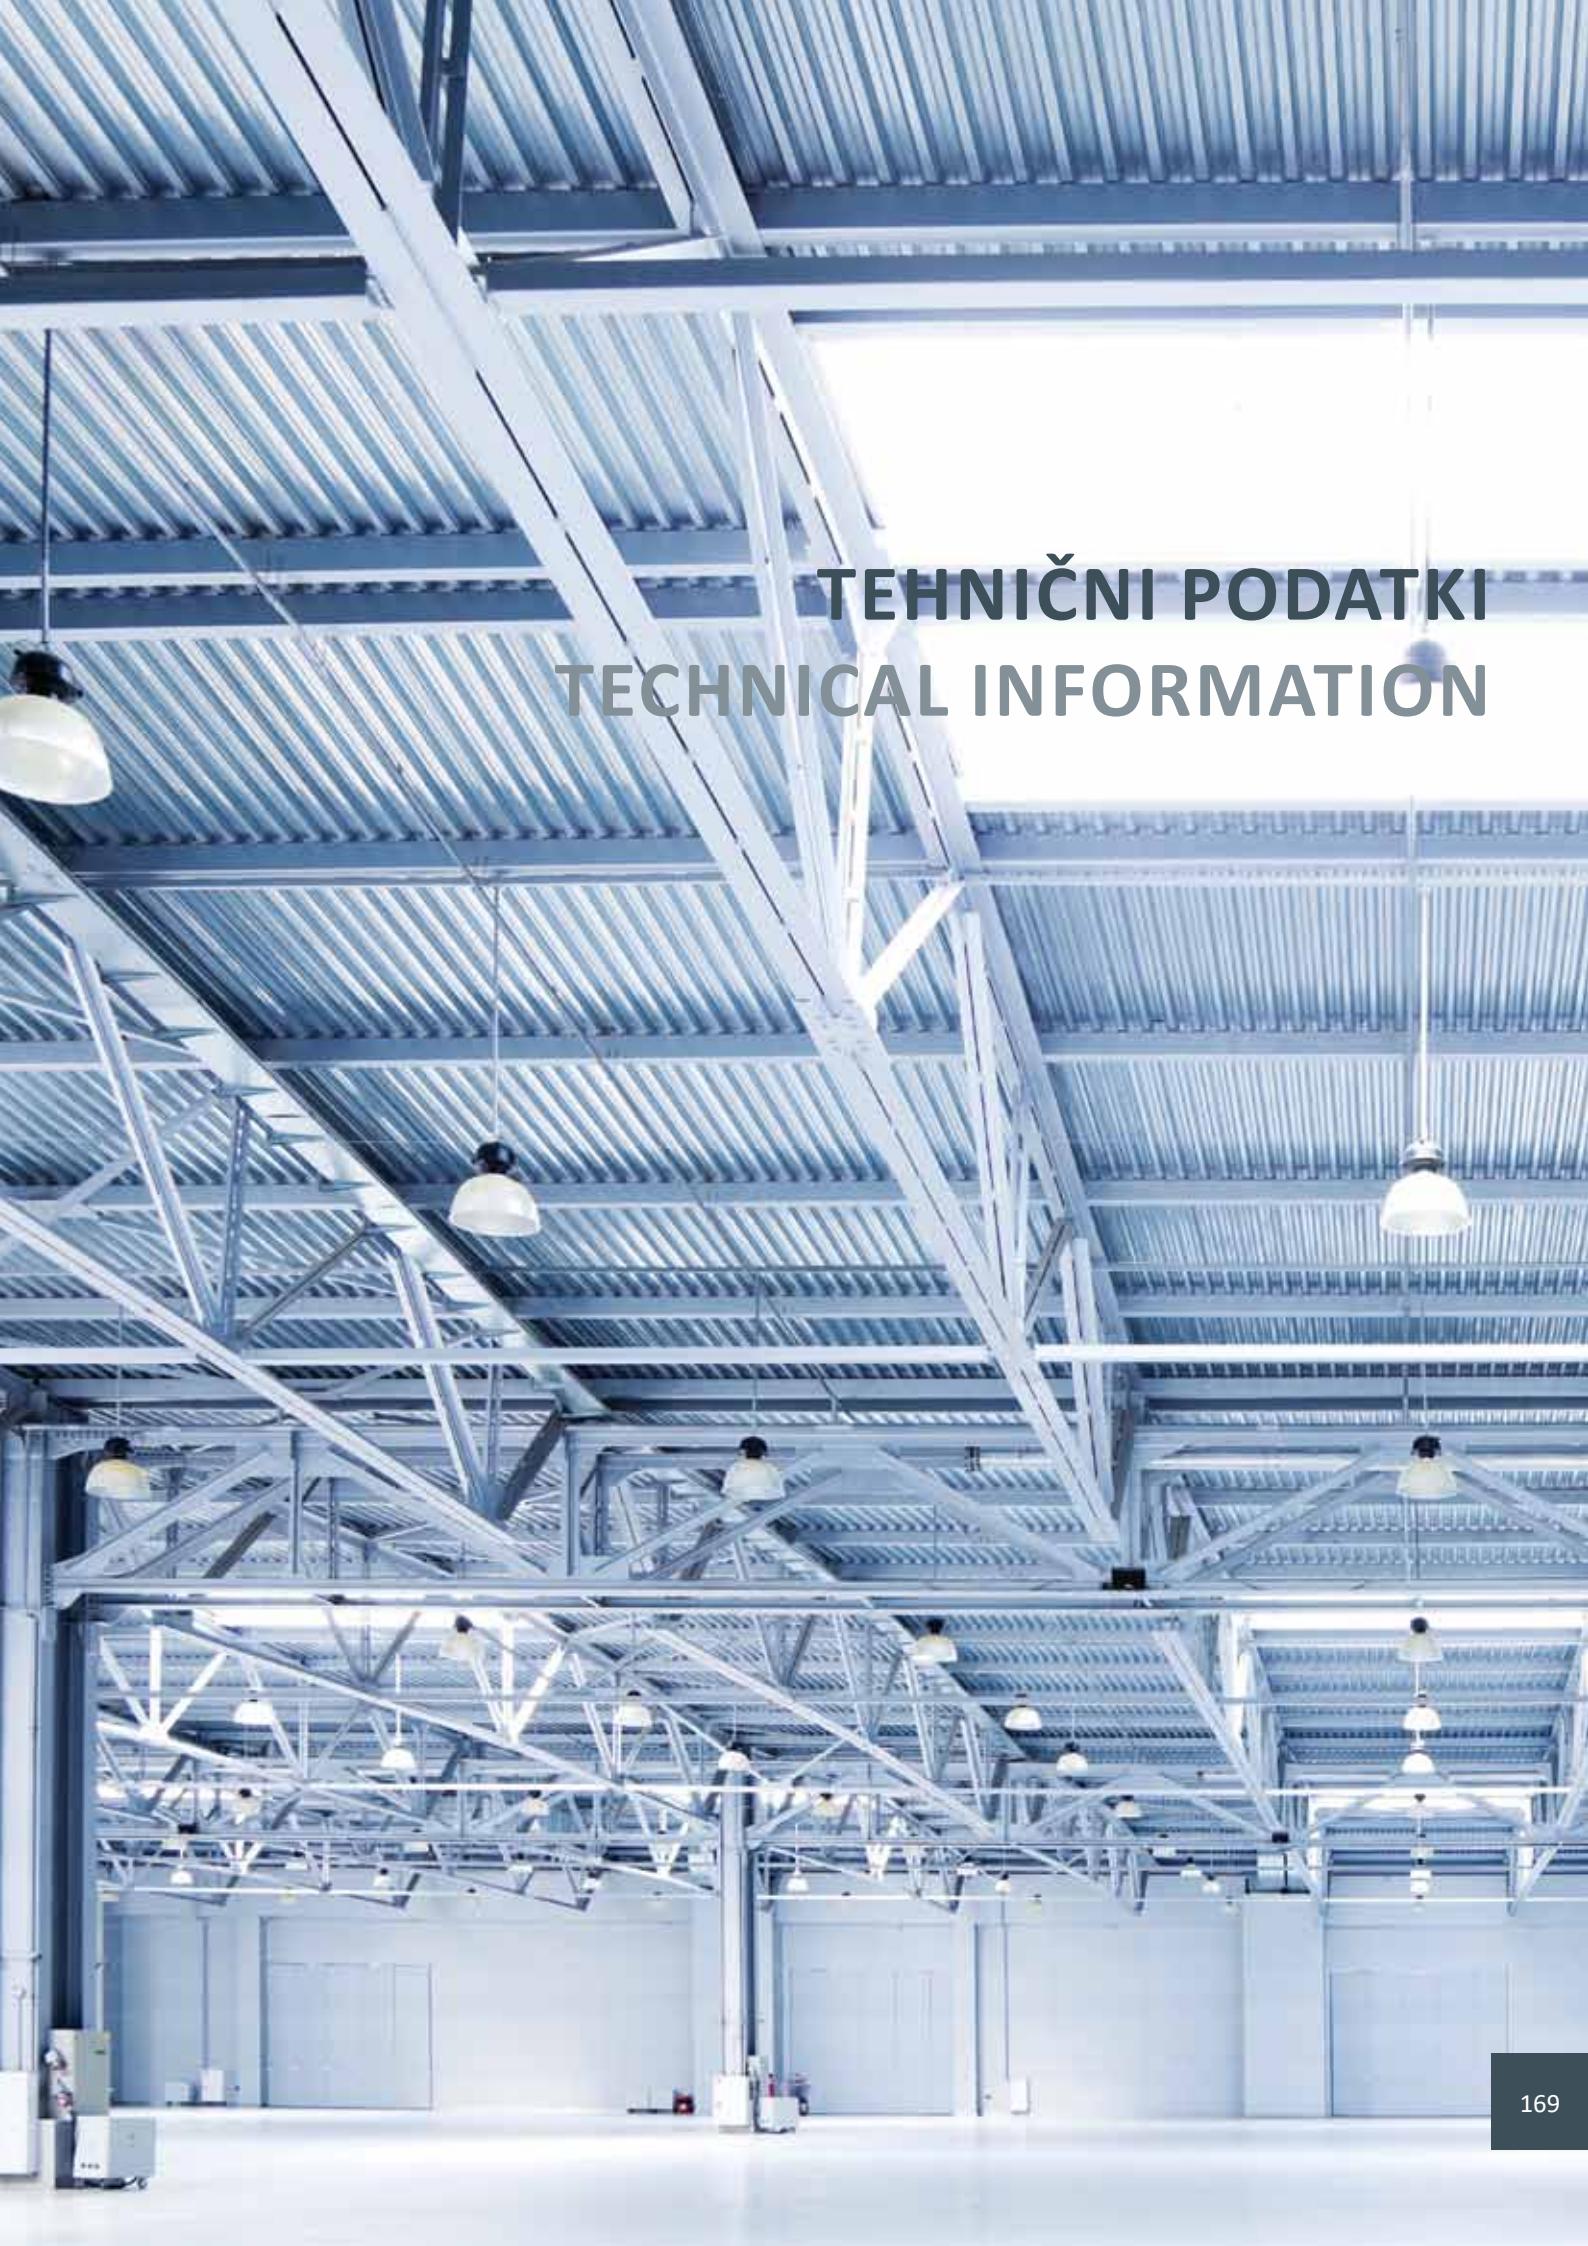

- Nano čistila (200 ml)
- Nano zaščitnega premaza (2 x 28 ml)
- Krpe iz mikrovlaken

Most Aquaestil shower screens are treated against limescale. However, we also offer the AQUACLEAN set as a separate item; which provides a protective nano coating to glass and ceramics. With this set, you may reapply the anti-scale layer when necessary and also protect other glass or ceramic surfaces in your home.

Set consists of:

- Nano cleanser (200 ml)
- Nano protective coating (2 x 28 ml)
- Microfiber cloth

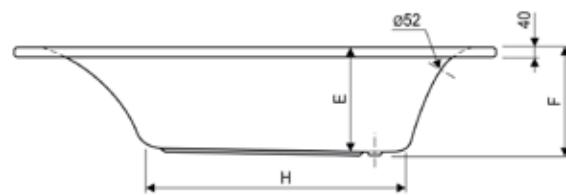

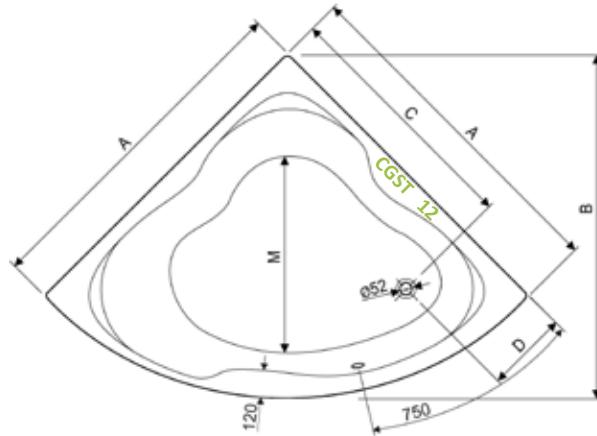

The background image shows a wide-angle view of a modern industrial or warehouse interior. The most prominent feature is a massive, multi-layered steel truss ceiling system, painted in a light blue-grey color. The trusses are interconnected by a network of beams and cross-bracing, creating a complex geometric pattern. Numerous white pendant lights with black shades are suspended from the ceiling at various heights, illuminating the space. The floor is a smooth, light-colored concrete. In the background, there are large, closed grey garage doors and some industrial equipment. The overall atmosphere is spacious and industrial.

PRAVNA OBVESTILA

Aquaestil plus d.o.o. si prizadeva, da bodo informacije v tem katalogu točne in kakovostne. Vendar pa Aquaestil plus d.o.o. ne zagotavlja in ne more imeti pravnih posledic za točnost in popolnost predstavljenih informacij, in si pridržuje pravico do spremembe izdelkov in njihovih lastnosti. Pri nameščanju naših izdelkov je potrebno poiskati strokovno pomoč, ker se način namestitve lahko razlikuje glede na okoliščine.

Družba namenja posebno pozornost proizvodnji kakovostnih izdelkov, vendar je njihova končna funkcionalnost odvisna od načina montaže in priprave prostora za namestitev. Svetujemo, da naše izdelke postavljajo izključno strokovnjaki. Garancijski rok vsakega izdelka je naveden na garancijskem listu in je garancija veljavna le, če je izdelek nameščen v skladu z dobavljenimi navodili. Aquaestil plus d.o.o. ne prevzema odgovornosti za poškodbe izdelkov ali predmetov, ki jih povzroči nepravilno ravnanje ali namestitev. Na paravanih, kateri nimajo na vseh straneh montiranih profilov ni mogoče doseči popolno funkcionalnost, kar pomeni, popolnoma zapiranje takih izdelkov ni zagotovljeno in pretok vode v manjši meri izpod tuša se ne more šteti kot rezultat proizvoda z napako.

Aquaestil plus d.o.o. je lastnik celotne vsebine, prikazane v tem katalogu.

V primeru dodatnih vprašanj ali komentarjev se obrnite na nas.

DISCLAIMER

Aquaestil plus d.o.o. makes every effort to maintain the accuracy and quality of the information provided in this catalogue. However, Aquaestil plus d.o.o. cannot guarantee and assumes no legal liability or responsibility for the accuracy or completeness of the information provided and retainsthe right to change products and their characteristics. You should take appropriate professional advice because the application of our equipment may vary depending on particular circumstances.

The company pays special attention to the quality of product design, but their ultimate functionality depends on the way of assembly and preparation of the mounting space. We advise that our products are installed exclusively by professionals. The warranty period for each individual product is indicated on the guarantee sheet provided with the products and the warranty is valid only if instructions indicated on the warranty sheet are respected. Aquaestil plus d.o.o. does not assume liability for damage to products or objects caused by improper handling or installation. In the case of shower screens that do not have profiles on all sides, it is not possible to achieve full functionality, that is, complete sealing with such products is not guaranteed and minor drainage from the showering area can not be considered as a consequence of the defective product.

The copyright of all content on this catalogue is owned by Aquaestil plus d.o.o.

In case of any questions or remarks, feel free to contact us.
