

Showers are about more than showering.

HÜPPE
SHOWER AND SOUL

Nothing feels better than water.

You can feel the pure anticipation as you step in. The rest of the world can wait outside for now - this moment is yours alone. The most pleasurable element in the world is swirling around you. Just how you wanted...

HÜPPE. Original made in Germany.

As a specialist in shower enclosures and system solutions, we are always focusing on quality and individuality. But of course that isn't all.

Bad Zwischenahn - Germany

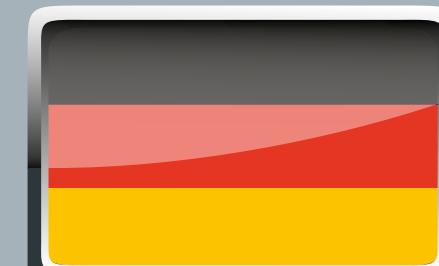

Founder of company:
Justin Hüppe

The HÜPPE name has had excellent resonance among traditional German companies for more than 125 years. From the very beginning the route to the company's international standing has been based on uncompromising quality awareness.

When HÜPPE developed the first real shower enclosure in 1966, a completely new market sector opened up. The company has been unwavering in asserting and consistently developing its defining role in this area.

In doing so, its excellent feel for trends and its audacity in innovation have demonstrated a capability that demanding customers all over the world put their trust in.

UNIQUE TECHNOLOGY

 **SoftClose**
UNIQUE TECHNOLOGY

 **HÜPPE[®]**
'ANTI-PLAQUE'

Innovation is not an end in itself.

We develop new materials and functions to make your life easier.
If this means new standards, so much the better.

Soft-Open/Soft-Close technology: A gentle tap is sufficient for the door to open and close as if on its own

At HÜPPE we put a great deal of investment into research and development. It has always been our ambition to find convincing answers to very simple questions.

Would it not be more practical if a shower enclosure made of glass hardly ever needed cleaning - because the water simply runs off it? Or if the final chink in the cubicle door almost closed on its own - to stop any water from spraying out?

Such considerations gave rise to the extremely low-maintenance Anti-Plaque quality glass in 1996, for example. Or the exclusive HÜPPE Soft-Open-/Soft-Close mechanism in 2011 and the innovative sliding door technology of the Xtensa pure in 2015, to name but three of the many HÜPPE milestones.

Xtensa pure: „Comfort-Walk-In“ with an innovative sliding door technology

1966 First supplier of shower enclosures in Europe

1978 HÜPPE develops first guiding rail for sliding doors

1979 First magnetic seal for shower enclosures

1980 HÜPPE offers first safety glass shower enclosure

1983 First frameless shower enclosure

1996 HÜPPE Anti-Plaque: the first easy-to-clean glass refinement

1997 HÜPPE Magna 5000: introduction of first swing-sliding door

2005 HÜPPE Manufaktur Studio: unique m-t-m concept

2006 HÜPPE 501 Design: modular product concept

2010 HÜPPE Studio Paris: chrome decors on glass

2011 First sliding doors with Soft-Open-/Soft-Close mechanism in new design styles elegance and pure

2015 HÜPPE Xtensa pure: introduction of the „Comfort Walk-In“ with an innovative sliding door technology

Our vision is based on facts.

HÜPPE is on the way to becoming Europe's leading brand for shower systems.
As it does so, nothing about the company's character and focus will change.

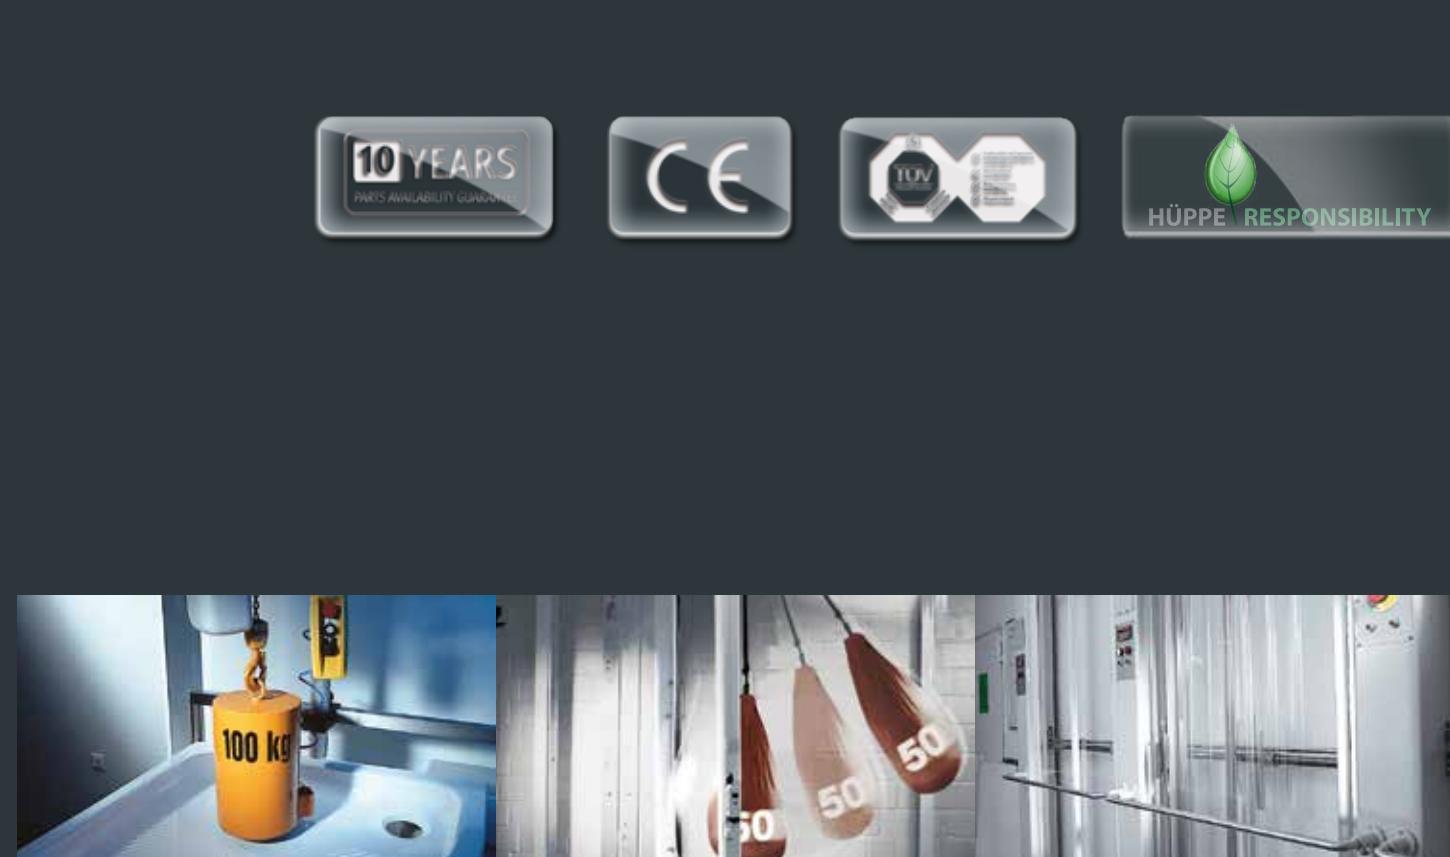

Best product quality, customer-orientated thinking and unique solutions define the core of our business. This will remain for the future in an increasingly internationalized market.

A sure view of the contemporary desires and needs of people is an indispensable element of this. We are constantly honing this through our own analysis and excellent external sources of inspiration.

The result is market-orientated offerings that stimulate and enthuse customers in the shower, just as much as they do our business partners.

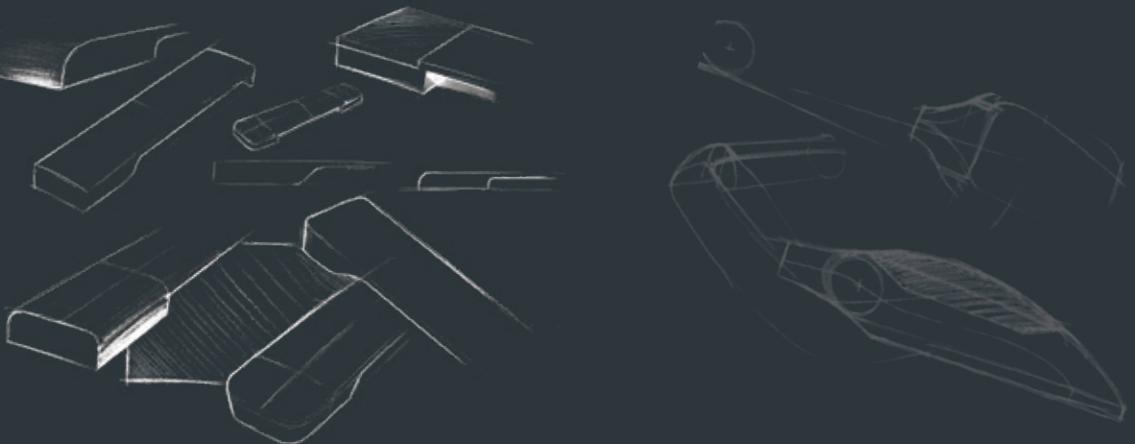

Duplo pure

We place the highest quality demands on every HÜPPE product and therefore test it to the most stringent standards. We even exceed the legally required norms. The same applies to our guarantee and servicing activities. Whether it's a parts availability guarantee, compliance with DIN EN 14428 requirements for shower enclosures, CE marking or even the German TÜV-GS-Certificate – with HÜPPE you're always on the right side.

Sustainability is a constant component of our philosophy, because we understand our responsibility towards the environment. For this reason we rely on the most environmentally friendly raw materials, such as glass and aluminium, and are constantly looking to reduce the emission of pollutants. HÜPPE shower enclosures are completely recyclable.

Companies of the MASCO Corporation

Good design has staying power.

Anyone who just follows fast-changing trends just ends up running after them in fact. To assert our leading role in product design, we rely on partners with international reputation.

Andreas Haug and Tom Schönherr – Phoenix Design

Phoenix Design stands for high end design. This German brand is constantly implementing extremely high demands in terms of logic, ethics and magic in products like no-one else.

But Phoenix Design doesn't just give the components and designs in the current HÜPPE lines their classic striking look. The Stuttgart company is also responsible for designing the shower fittings for our partner hansgrohe.

This is how product families that are in superb harmony arise - in parallel and in every area for both companies. Because they have identical genetic codes.

By implementing the design styles PURE and ELEGANCE, two lines with strictly individual characters were created. What unites them is the unbelievable variety of combination options. In the world of music this is called 'crossover': the melding of the existing with something excitingly new.

Winners of international design awards such as red dot, Interior Innovation, Plus X and the German Design Award. These distinctions have one thing in common: they are coveted, very highly recognised international awards granted by renowned, independent juries. All confirm the high quality and innovative design of our products.

PURE

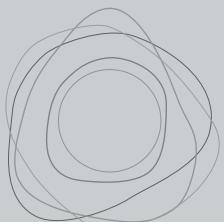

Studio Berlin pure

Clear lines, the perfect right angle: the design rigorously subordinates to functionality. If less is more, the PURE design range is the maximum. You don't need to add anything - your fascination will be spontaneous.

Hinge Studio Berlin pure

ELEGANCE

Studio Paris elegance with chrome decor on glass

As time keeps flowing by, so the ELEGANCE design range keeps endlessly inspiring our imagination. Organic, soft shapes inspired by the sumptuous variety of life. Combined with optimum functionality of course.

No individuality without breadth.

HÜPPE develops system solutions for shower spaces of any type and any installation situation. A prerequisite for this is the optimum compatibility of the structural elements and components. And the readiness to go to new places with them.

Handle Design pure

Handle Design elegance

Shower tray

Hinge chrome/chrome, Hinge chrome/brilliant gold

The world of our system solutions revolves around unique, modular variety. Everything is compatible, everything is possible. With colour accents or glossy new ideas in chrome, from individual production series to spectacular unique designs.

Service and motivated advice help our customers understand and perfectly exploit the many HÜPPE options. So before you think you've reached the limits of what's possible, talk to us about it.

Why not reach for the stars?

No top class hotel can afford itself the luxury of falling short of expectations.
The guest is always king, and the king only rarely forgives.

Tanzende Türme, Hamburg, Germany

Adlon Kempinski, Berlin, Germany

Nobody should plan on compromises for valuable moments of relaxation. And a shower solution from HÜPPE is a perfect fit wherever the ambience reflects high quality of life

Opting for HÜPPE quality is an investment that especially pays off when usage levels are high. Long lifespan, durability, safety and reliable functionality are factors that are sure to repay you in the medium term.

Our concept is understood worldwide.

HÜPPE solutions are more and more in demand across the world. No wonder. An excellent cost/benefit ratio is the hardest currency in the world.

The numbers of designed and supplied shower solutions for international hotels and hotel chains speak for the strength of the HÜPPE concept: quality down to the details plus flexible customisation. Plan for your project in our Premium / Medium / Basic categories.

AIDAluna,
AIDA Cruises

The goal is optimum comfort on board.

The lines we choose for fitting out on board ships changes from job to job. Our experience with flexible materials and special construction shapes comes to the fore here especially.

Is there a difference between demanding passengers and hotel guests? Essentially no. For both, personal comfort is the essential criterion for satisfaction.

However, when fitting out ships, perfect ergonomics must take up far less space. Our concepts for ships take this into consideration and still make a flood of ideas possible. Thereby the character of the ship itself appears in all cabins.

Norwegian Epic,
Norwegian Cruise Line

MS Deutschland,
Shipping company Peter Deilmann GmbH

Celebrity Silhouette,
Celebrity Cruises

Good ideas make things much more comfortable.

Removal of barriers plays a central role for activities at any age. How wonderful that this goal can be achieved with outstanding design as well.

Studio Paris elegance

The perfect shower looks different to everyone not only for taste reasons. Therefore the variety of options we offer enables as well with view to ergonomic aspects a diversity of solutions.

Under high usage levels the class of material and functionality must prove itself once again every day. Nobody should need to be thinking about the details here. Because this is exactly what we have done during development.

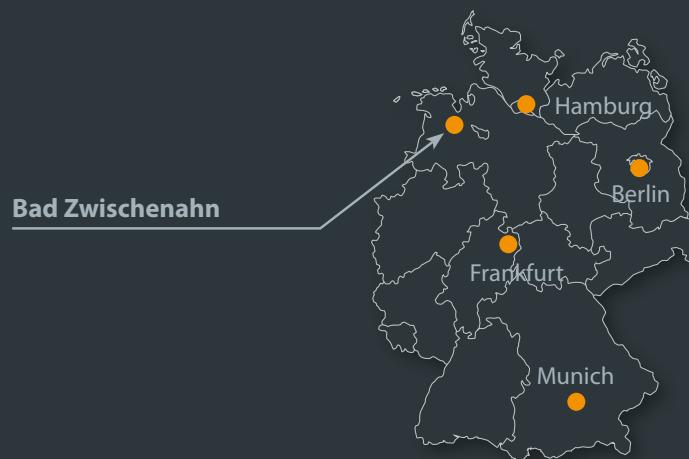

Hence you can assume that we will consider floor-flush installations or m-t-m waste systems not only for visual reasons.
